

Activity 4

Misinformation on the Internet

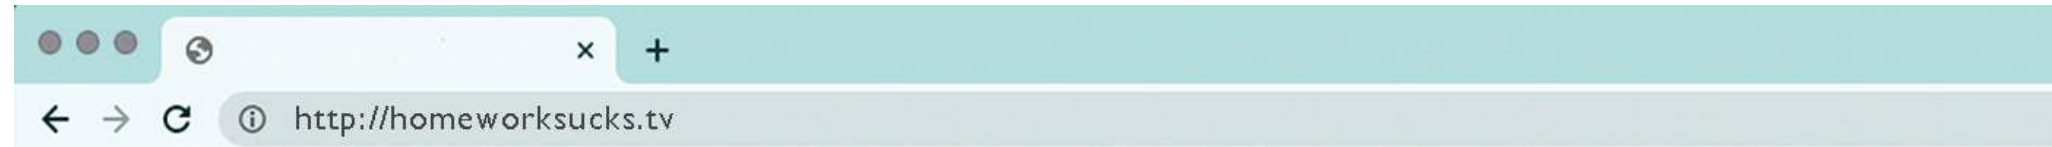

Help!

I am researching Climate Change for an article for the School News Bulletin. I've found this website and am not sure whether or not I should use it to help me to write the article.

Do you think I should use the information that it contains in the article? Why?

Highlight and label the things that make you think this website is trustworthy OR untrustworthy.

Climate Change!!!! Fact or FICTION????

Posted on 15 Nov
by Aaron Z

Have you got homework about Climate Change but can't be bothered to do the work? Here is all you need to know.

The word climate refers to how hot or cold it is on the Earth. Some people think that this has changed in the last few years. Scientists talk about global warming but I know for sure that this summer has been a lot colder than others so I'm not sure if they are right. What's that about?

Climate Change is where the weather changes. Some days it is really hot and other days it is freezing cold and scientists don't really know why. Some scientists think that it is because we are using too much water and throwing away too much rubbish but no-one knows whether that is true or not.

There are some countries in the world that are doing lots of things to stop global warming but others that aren't doing much at all. If it was such a big deal, wouldn't all countries be stopping throwing rubbish into the sea?
